

APPOINTMENT / RECRUITMENT

Vapi Green Enviro Limited, Non – Equity – Non-Profit entity, based on cooperative principles with corporate culture of management, was formed with an objective of providing a comprehensive Environment Management Program (CEMP) for the estate.

We have installed end of the pipeline treatment facilities like common effluent treatment plant (CETP) and transport, storage, disposal facility for hazardous solid waste (TSDF) to control pollution levels and now focus is shifted to pollution abatement by adopting and promoting cleaner production, cleaner technology for cleaner development mechanism.

We have Centre of Excellence that has been conceived to provide state of the art facilities, to our industry, for constant Up gradation of processes and products and for developing new products. As Vapi is home to over 1800 small and medium sized manufacturing units, thus, it is the perfect location for the Centre of Excellence. We believe that along with providing the latest technology and equipment's at a very reasonable price, the Centre of Excellence shall also serves as a platform for interaction within the community, thereby resulting in its faster growth. Beyond its role as an R & D facility we also perceive the Centre of Excellence to function as a World Class testing lab.
